

AINA KEPLER WI-FI

AINA Kepler Wi-Fi is an all-in-one communicator with Wi-Fi network connectivity, an integrated PTT application and device-to-device communication (DMO) for when the network is down.

WI-FI CONNECTIVITY

AINA Kepler uses a Wi-Fi connection. As a stand-alone speaker-microphone it says farewell to compatibility issues and app changes breaking the system.

DEVICE-TO-DEVICE COMMUNICATION

AINA's Direct-Mode-Operation (DMO) allows you to communicate even when your mobile or Wi-Fi network is not available by creating a one-hop mesh network through your device. Do your job and stay connected all the time.

HIGH QUALITY AUDIO

Whether you work in a noisy, loud or windy environment, Kepler Wi-Fi features crisp and clear audio quality. The device includes Audio DSP for noise, wind and static reduction and echo cancellation.
