

# AINA PTT SMART BUTTON: UI SPECIFICATION

v. 2.0 - PUBLIC

## 1. SCOPE

This document defines the user interface functionality of AINA's PTT Smart Button device. The device has 3 leds (red, green and amber) for providing feedback and state information to the user. User can interface with the device using the buttons.

## 2. LEDS

Following led patterns are defined:

- Reset pairings; Green led turns on and stays on as long as reset pairings buttons are pressed
- Bootloader; Red led turned on as long as in bootloader state (Blinks once on normal bootup)

## 3. BUTTONS

Following button combinations are defined:

- Reset pairings; Press PTT1 + PTT2 + EMERGENCY buttons simultaneously until green led lights up
