

# CRITICAL COMMUNICATIONS FOR PUBLIC SAFETY

Seamless communication between emergency units, dispatch centers, field commanders, and support teams plays a critical role in protecting lives and maintaining public safety. Even small breakdowns in coordination during an incident can lead to delayed response times, reduced situational awareness, and increased risk for both responders and the public.

**SPEED, CLARITY, AND RELIABILITY OF COMMUNICATION ARE MISSION-CRITICAL.**

With Aina PTT solutions, public safety teams stay connected, coordinated, and ready to respond — whether in daily operations or large-scale emergencies.

## AINA PTT VOICE RESPONDER

Designed for demanding environments, the Aina PTT Voice Responder delivers:

- Loud, clear audio — even in high-noise situations
- Reliable message delivery with immediate acknowledgement
- Hands-free communication for active field personnel
- Seamless integration with Push-to-Talk applications

From incident command to field units, communication flows instantly and without disruption.

# AINA PTT DEVICES ARE BUILT FOR CRITICAL ENVIRONMENTS

## AINA PTT SMART BUTTON

Press. Talk. Alert. Respond — in seconds.

The Aina PTT Smart Button is a versatile and durable Push-to-Talk control device, ideal for public safety professionals who need simple, fast, and reliable communication.

## KEY CAPABILITIES

- Instant Push-to-Talk communication at the press of a button
- Emergency alert function for critical situations
- Call request signalling for fast coordination
- Can be used as:
  - A standalone PTT button
  - An emergency alert device
  - A companion to speaker microphones or radios

## WHY IT MATTERS FOR PUBLIC SAFETY?

Communication failures are not an option. Whether coordinating emergency response, managing incidents, or ensuring public safety:

- Teams must connect instantly
- Messages must be clear and confirmed
- Alerts must be sent without delay

Aina PTT solutions transform mobile devices into professional-grade communication tools, enabling faster responses, improved coordination, and safer outcomes.
